

## VETERINARY COLLEAGUES

If you have any clients who might be interested in volunteering for our survey, we would be very grateful.

Our group is investigating **urethral obstructions in male cats managed without surgery.**

We are particularly interested in the client's experience with advice pertaining to **HOME CARE**: food, water, litterbox management, individual space, social interactions and engagement in natural feline behavior.

The survey is open to:  
Any cat owner over the age of 18 years.  
Anyone living with a cat diagnosed with a urethral obstruction.

As a voluntary participant in this study, your client would complete our 30-45 minute online anonymous survey.
